Alexandria, VA — The American Physical Therapy Association was recognized for its leadership in advancing the future of health care professionals at the 46th Annual International Leadership Conference of HOSA: Future Health Professionals. As a recipient of the HOSA-100 National Advisory Council Award and HOSA Outstanding Professional Association Award, APTA continues to demonstrate its commitment to advancing the future of all health care professionals.

“It has been a privilege to partner with HOSA over the past decade,” said Mya Shackelford, manager of student recruitment at APTA. “This partnership continues to open doors and provide opportunities for APTA to connect with future physical therapists and physical therapist assistants while raising awareness of the profession.”

“The partnership between APTA and HOSA provides a unique way to spotlight career opportunities in the physical therapy profession and develop industry-based skills and interest among HOSA advisors and their student members,” said HOSA Executive Director Sarah Walters.

In addition to receiving its own honors at the HOSA International Leadership Conference, APTA awarded scholarships to two high school seniors who are seeking to pursue careers in physical therapy.
